

Landscape Committee Report  
Licorice Fern II HOA  
November 7, 2013

On Wednesday evening, Lynn Marshall and I drove the neighborhood to check on the work that Merlin's Magical Landscaping is doing for our HOA. All common areas are being well maintained.

Merlin's Magical Landscaping sprayed the weeds in our sidewalks and street on October 28, 2013 - the 3rd time this year. If necessary, they will spray again. They also removed a large Butterfly Bush and the roots, at the end of Licorice Way. They did this for us at no additional charge and this gives us more room for community activities held in the cul-de-sac.

I asked Sean, today, to please cut back the grasses located at our entrance planting area. He will do this within the next couple of weeks.

Once the deciduous trees have dropped their leaves, if the County has not already done so, they will be called to request that a street sweeper come through the neighborhood. As part of their contract, Merlin's does blow the leaves from the Jersey Barriers and the common areas.

One suggestion for the Board, is to send out an e-mail to request that everyone pick up the leaves in front of their homes that have gathered in the street's gutters. This will help with the drainage of our streets and will help the leaves to not get into the drain pipes.

Respectfully Submitted,

Debbie Pilling
